FOAMULAR EXTRUDED POLYSTYRENE CHOSEN FOR THE INSULATION OF THE STAR CITY CASINO

Sydney based company Silk Road Internal Linings has won the contract to supply and install **Foamular Extruded Polystyrene** as part of the current renovations to the High Rollers Guest accommodation at Star City Casino in Sydney.

Austech External Building Products in conjunction with BGC Plasterboard Trade Centre in Yennora supplied in excess of 1100 m² of **Foamular** to the Star City project.

Foamular Extruded Polystyrene is a closed cell **Extruded Insulation** board that has high **Insulation** values that are maintained over the long term. The added benefits of minimum moisture absorption and high compressive strength ensure **Foamular Extruded Polystyrene** will contribute to long term thermal and energy efficiency of the building and reduce environmental impacts associated with excessive energy use.

Austech and Foamular are committed to supplying long term cost and energy efficient **Insulation** systems that will meet industry demands well into the future.
