

RECOMMENDED TOOLS AND PRODUCTS

Austech recommends the use of tested and approved glues, sealants and epoxy resins at all times for best results with Versatech mouldings. We reserve the right to add or delete products from our recommended list.

Recommended tools:

- tape measure
- utility knife
- sharp handsaw
- combination square
- pencil
- 75mm broad knife
- caulking gun
- nails
- screws
- bolster or chisel

Recommended adhesives:

- Bear Stronghold
- Sika Bond
- only those construction adhesives recommended for use with polystyrene

Recommended sealants:

- Sika Flex 1A
- Pro Z

NOTE: Sika Flex 1A or PRO Z HP is both an adhesive and waterproofing sealant, and when applied correctly is your primary adhesive. The construction adhesive will hold Versatech moulding in position until the Sika Flex has cured.

Recommended joining products:

- West System Epoxy Resin
- 105 Resin
- 205/6 Hardener And 403 Micro Fibre Blend
