FOAMULAR EXTRUDED POLYSTYRENE USED TO INSULATE COLDSTREAM WINERY

Helens Hill Winery owners Allan Nalder, Andrew and Robyn McIntosh have chosen Foamular Extruded Polystyrene to insulate their new wine storage shed at their recently revamped Yarra Valley Winery.

Allan Nalder said he was "looking for a product that would maintain a constant temperature without the extra costs of additional power supply and an upgraded cooling system, Foamular fitted the bill perfectly".

R.E. Roofing installed the Foamular for Skate Constructions who have built over a dozen Wineries in the Yarra over the last 30 years.

Helens Hill Winery complex includes a restaurant, tasting room, barrel room and vat room and the new storage shed stores well over 300 pallets of wine ready to ship.
