Duratuff is thermally efficient and looks great

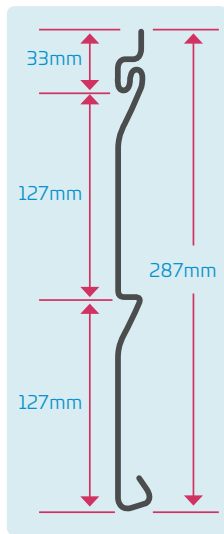

Duratuff an Australian styled premium vinyl cladding, architecturally designed for beauty and simplicity replicating the gentleness and warmth of traditional timber weatherboards.

Duratuff combines the 14 attractive contemporary colours of classic styling with all the benefits of modern technology. It can be installed over the existing exterior, reduces surrounding noises, tested against all weather conditions and will not crack, warp, rot, or peel. You will not need to paint it, the only maintenance required is an occasional wash down to keep it sparkling clean like day one.

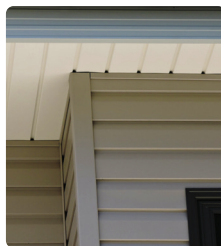

Reduce your energy bills all year round by keeping warm in the winter and cool in summer. UPVC has sound dampening qualities reducing surrounding noise and expanded polystyrene (EPS) insulation contains a termite retardant – Bifenthrin (Austech use 62% more than the minimum requirement).
