Premium Vinyl Cladding

Portsmouth Shingles

The birthplace of “Hampton Style”

Colour, texture, depth, emotion, form and function all come together in richly crafted rustic cedar-look shingles with nearly zero maintenance.

Achieving the exterior that expresses your home the way you want it takes time, thought and the right combination of cladding, trim, accents, colour and dimension...

Whether you're searching for a complementary fusion of styles and textures or the homerun palette that takes you to the next level. We're here to make exterior home design exciting.

Portsmouth will get you to your “wow” place.

Soffit- Eaves Soffit

Finishing well starts here

Soffit boards do more than mesh seamlessly with your roof overhangs; they finalise the “never paint again” exterior, endlessly protecting the hard to reach eaves.

Soffit boards are virtually maintenance-free and their low-gloss, brush finish complements any architectural style.

Readily available in classic White and Linen (off white), you can also special order any colour you wish within the Portfolio – see over.

*Minimum order quantities may apply

A top-notch final touch, how fitting.

Board and Batten

Trending vertical design

In a starring role or as a complementary accent, Board & Batten makes the most of its vertical contour adding dimension and character to any home style.

Board & Batten resides impressively at the intersection of modern and rustic. It complements a full range of home styles but is especially well suited to Flat and Skillion roof designs.

Board & Batten, a contemporary statement.

Lifetime Warranty

Non-Prorated Transferable

We have total confidence in the quality of all our products and back them with one of the industry's most powerful warranties.*

Duratuff Select

Thermal efficiency never looked so good

Select Duratuff a uniquely Australian styled premium vinyl cladding architecturally designed for beauty and simplicity replicating the gentleness and warmth of traditional timber weatherboards.

Duratuff Select combines the attractiveness of classic styling with all the benefits of modern technology and production. Once installed, the only maintenance required is an occasional wash down to keep it sparkling clean like day one.

- Select** – manufactured to Australian Standard 4256.4 for our harsh conditions.
- Select** – the savings of outstanding thermal efficiencies in uPVC insulated weatherboards.
- Select** – the widest colour palette available in Australia that never needs painting
- Select** – the outstanding value of an unsurpassed product life cycle
- Select** – the enduring colour retention of colour-fast technology
- Select** – the individual profiles of your choice
- Select** – the intelligent choice in cladding
- Select** – the confidence to give a non-prorated, transferable, Lifetime* limited warranty
- Select** – the perfect choice for home renovation and new construction

Thermal efficiencies in uPVC

Transferable, Lifetime* limited warranty

Australian Standard 4256.4

Speedy no-fuss installation

High impact and fade resistance

Remarkably Green

As “green” building continues to play a vital and growing role in the long term health of our planet, today’s vinyl siding delivers many recognized benefits.

From production, which starts in facilities that recycle virtually all scrap materials, to transportation, to Installation and throughout the product life-cycle it’s a clear front runner in the building game.

By selecting vinyl siding, homeowners can help make and keep their homes green, doing their part to make communities – and our planet – sustainable. *

*For further information download “A dozen things you might not know that make vinyl siding green.”

True Value Rewards

Select premium vinyl is one of the lowest maintenance claddings you can buy. Unlike fiber cement and hardwood Select never needs painting to maintain it’s good looks.

To paint a whole house, HiPages says you can expect to pay between \$7,000 to \$12,000 for a small one-storey and between \$10,000 to \$20,000 for a two-storey weatherboard house.

Accounting for 3% annual inflation and 10-year painting intervals, the true cost of just painting these other claddings will average more than \$80,000 over 30 years.

Average 30 year painting cost of timber weatherboard home

The above table is formulated using data extracted from HiPages January 2020.

Zero Health Risks

Vinyl siding does not utilize any materials that can cause adverse health effects to installers or anyone.

Advocates or manufacturers of silica-based fiber cement, like James Hardie’s siding products, cannot make this claim.

As stated on the James Hardie Building Products Material Safety Data Sheet, silica-based fiber cement may potentially cause adverse health effects such as silicosis (an incurable lung disease) to installers who do not use respirators.
